

There's No Place Like Home For Southbrook Community Church

Southside Constructors, Inc. to build house of worship for new church

The new facility for Southbrook Community Church (above) has enabled Southbrook's ministry to begin worshipping in its own house rather than Providence High School, where the church members were previously gathering on Sunday mornings.

The current ministry of *Southbrook Community Church* files into Providence High every Sunday morning to worship in the school's auditorium. Afterwards, everything incorporated in the worship service, i.e. the colorful praise banners, tables, chairs, children's church, etc., is packed up and put away into trailers until the following week's service. However, in six months, the congregation of Southbrook plans to hold its first worship service in its new multi-use facility. *Southside Constructors, Inc.* has been contracted to build the 12,000 SF facility at the intersection of Weddington Road and Antioch Church Road in Matthews, North Carolina. The multi-use facility is the first in a three-phase venture. It has incorporated all of the church's ministry needs for its Sunday morning services as well as its mid-week services currently held Wednesday nights at The Brook. The Brook also provides rehearsal space for Southbrook's band and drama team. With the proposed facility, a stage has been incorporated into the design for upcoming band and drama recitals.

The new, irregular-shaped building houses the following items:

- 300+ seat sanctuary, centered in the multi-use facility. A large platform will span one end of the sanctuary for use during worship services, as well as the band and drama team rehearsals
- Separate infant and toddler nurseries
- Classrooms for Children's Church and Adult Sunday School
- A Youth Room, large multi-purpose room and neighboring Music Room
- Offices for the Pastor, Director of Operations, and other staff
- A café where members can gather to drink coffee and converse

Owner:
Southbrook Community Church

Area:
18,000 SF

Completion Date:
2006

Services Provided:
General Construction

Construction Cost:
\$1.95 Million
